NAME INDEX

Abbott, Andrew, 26, 29
Aghajanian, Akbar, 15
Agresti, Alan, 8, 18, 157
Ahmad, Khalil, 280n
Ahuja, Om P., 280n
Aitchison, John, 19
Akaike, Hirotugu, 149, 162, 163, 165, 167, 169, 300
Akerlof, George, 53n, 103
Alba, Richard D., 329n, 354n
Albert, James, 17
Allison, Paul, 15
Altham, Patricia M. E., 289n
Altschul, S. F., 29
Alwin, Duane F., 12
Amemiya, Takashi, 18
Anderson, Elijah, 51, 52
Anderson, Philip, 71, 71n
Ansell, C. K., 26
Appold, S. J., 30
Arminger, Gerhard, 14, 276n, 289n
Aronson, Elliot, 52
Arrow, Kenneth J., 92t
Arthur, W. Brian, 72
Axinn, W. G., 15

Back, Kurt, 310
Baker, Michael, 270
Baker, R. J., 16
Banfield, Jeffrey D., 30, 277n, 300
Barman, Emily, 29
Barnard, John, 25
Basford, Kaye E., 224
Batagelj, Vladimir, 342f
Bates, Douglas M., 300
Beale, E., 276n, 289n
Bearman, Peter S., 26, 29, 30
Beck, Nathaniel, 2
Becker, Gary, 50
Becker, Mark P., 8
Begg, Colin B., 18
Bénabou, Roland, 50
Benzécri, J.-P., 6
Bernhardt, Annette D., 10, 270, 272, 290, 290n
Besag, Julian E., 26, 27
Biblarz, Timothy J., 7
Bikhchandani, Sushil, 58n
Birch, M. W., 5, 6
Bishop, Yvonne M., 374
Blalock, Herbert, 55
Blalock, Hubert M., 12, 20, 24, 108n, 111, 119
Blau, Peter M., 4, 12, 12f, 94, 354n
Blume, Lawrence, 71
Boatwright, Peter, 21
Bock, R. D., 20, 21
Boguski, M. S., 29
Bollen, Kenneth A., 13, 30
Boomsma, A., 14
Borgatti, Stephen P., 326
Bosker, Roel J., 21

Bowles, Samuel, 94, 95, 96
Bowman, K. O., 372, 374
Box, George, 275
Boyd, L. H., 20
Bradlow, Eric T., 21
Brewster, Karen, 51n
Brock, William, 61, 62, 66, 74, 78, 79, 79n, 84, 107, 108n, 116
Brooks-Gunn, Jeanne, 51n
Brown, Roger, 52
Browne, Michael W., 2
Brudner, Lilyan A., 350
Brumback, Babette A., 282
Bryk, Anthony S., 21, 75n
Bucur, Alexander, 7
Bumpass, Larry, 114, 114n
Burt, Ronald S., 15

Calhoun, Craig, 117
Card, David, 50n
Carley, Kathleen M., 28, 29
Carlin, John B., 21
Carr, Deborah, 28
Carron, Albert V., 310
Cartwright, Dorwin, 309, 321n, 329n, 336n
Casterline, John B., 21
Celeux, Gilles, 9
Chafee, Mark V., 341
Chambers, Jack K., 62
Chamratrithirong, Aphichat, 114
Charles, Maria, 8
Chib, Siddartha, 17
Chickering, D. Maxwell, 9
Chilès, Jean-Paul, 27
Chinchilli, Vernon M., 300
Clogg, Clifford C., 2, 6, 9, 224, 244, 246, 249, 255, 277, 300
Coale, Ansley J., 113n
Cohen, K. L., 276n
Coleman, James, 97, 105, 112
Collins, Randall, 30
Cooper, Russell, 73
Cornfield, Jerome, 16
Costner, Herbert L., 24
Cowell, R., 13
Cox, David R., 14, 16
Crane, Jonathan, 51n
Crouchley, R., 274
Crowder, Kyle, 51n
Curran, Sara R., 114

Daniels, Michael J., 21
Danziger, Sheldon, 267
Datta, G. S., 21
Davies, R. B., 274
Dawid, A. Philip, 13
De Graaf, Nan, 8
De Leeuw, Jan, 236, 237, 249
Delfiner, Pierre, 27
Dempster, Arthur P., 21
Denton, Nancy A., 27
Devlin, Susan J., 276n
Diekmann, Andreas, 15
Dijkstra, W., 29
DiPrete, Thomas A., 21, 111, 119
Dirac, Gabriel A., 333n
Dominitz, Jeff, 111
Doreian, Patrick, 306, 327
Du, J. T., 25
Duncan, Beverly, 27
Duncan, Greg, 51n
Duncan, Otis Dudley, 4, 6, 11, 12, 12f, 13, 27
Duneier, Mitchell, 52
Durkheim, Emile, 2
Durlauf, Steven, 50, 51n, 61, 62, 66, 71, 74, 78, 79, 79n, 81, 84, 107, 108n, 113, 116

Earls, Felton, 51n, 83
Eisenberg, Theodore, 2
Eliason, Scott R., 6
Elliott, Michael R., 21
Elster, Jon, 70
Entwisle, Barbara, 21, 114
Erbring, Lutz, 108n, 109, 112

Even, Shimon, 324
Everett, Martin G., 324n, 326, 349

Fahrmeir, Ludwig, 15
Fararo, Thomas, 306, 365
Faust, K., 26, 309, 329, 351
Fay, Robert E., 22
Featherman, David L., 11, 25, 218
Ferguson, Linda R., 15
Festinger, Leon, 310
Fienberg, Stephen E., 2, 9, 374
Fisher, R. A., 92t, 251
Flay, Brian R., 274
Ford, Lester R., 331, 332, 333
Formann, Anton K., 237, 249, 250, 255
Forristal, Jerry D., 21, 111, 119
Foster, Brian L., 328
Fraley, Christina, 30, 224
Frank, Ove, 26, 388
Franzosi, Roberto, 28, 29
Freedman, David A., 12

SUBJECT INDEX

abortion attitudes data, application of categorical profiles to, 166–79
adhesion. *See* social networks, *subheading* cohesion and adhesion
Akaike information criterion, 163–5
asymptotic distribution and relation with the p model, 388–9

BIC, use of, 9, 10
binary choice model (social interactions), 78–80
binary decision rules (social interactions), 60–5
  multiple equilibria, 66–8
  properties of, 65–9
  social welfare, 68–9
bi-plots (LC models)
  conditional probabilities, formulation using, 255–7
  1982 General Social Survey data (LC models), 233–7
  restricted two-factor model, 244, 245
  rheumatoid arthritis data, 242
  two-factor model, 251–1, 254
Bowle's commentary re: Durlaf's approach to social interactions, 89–96
  Durlaf's response, 123–4

categorical data analysis, 5–8
  categorical profiles. *See* categorical profiles
  latent class (LC) models. *See* latent class (LC) models
  multiway tables, association in. *See* multiway tables, association in
categorical profiles, 130–4
  abortion attitudes data, application to, 166–79
  conditional independence of response variables given an explanatory variable, 150–2
  Guttman scaling, 154
  models and data summaries, 134–6
    entropy and logarithmic penalty function, 136–8
    estimation, 160–2, 180–2
    examples of, 149–60
    information from summaries, 145–6
    log-linear models, 139–42
    normal approximations, 162, 182–5
    optimal prediction, 143–5, 180
    prediction sets, comparison under sampling, 146–9, 163–6
    probability prediction functions, 138–9
  mutual independence of response variables, 149–50
  prediction sets, comparison under sampling, 146–9
    Akaike information criterion, 163–5

Bayesian information criterion, 165–6
hypothesis tests, 163
saturated model for a categorical explanatory variable, 142–5
saturated model without explanatory variables, 141
symmetric interactions associated with category accounts, 155
symmetric interactions with scored reactions, 155–9
two-way interactions associated with average responses and explanatory variables, 159–62
two-way interactions of response variables, 152–4
two-way interactions of responses and a categorical explanatory variable, 154–5
causality in unit-level survey data, 23–6
cohesion. *See* social networks, *subheading* cohesion and adhesion
conditional density. *See* social networks
counterfactual approach to causality, 24, 25–6
covariance models for latent structure (in longitudinal data), 265–72
application and comparison, 289–99
confidence intervals, construction of, 300–1
general multiple proto-spline model, 282–3
illustration, 287–9
individual-specific analysis, 273–5
latent class (LC) models, 277–8
latent curve models, 275–7
double latent curve model, 293–5
single latent curve model, 291–3
population-average analysis, 273
proto-spline models
general multiple proto-spline model, 282–3
mixed effects models, link to, 283–7
single proto-spline model, 279–81, 291–3
random quadratic model, 290–1
single proto-spline model, 279–81, 291–3
variance partitions, comparing, 295–8
Cox model, 14–15
cross-tabulations
categorical data analysis, 5–8
historical overview, 3–4
hypothesis testing and model selection, 9–10
latent class models. *See* latent class (LC) models

Dechter's commentary re: Durlaf's approach to social interactions, 107–20
Durlaf's response, 127–8
double latent curve model, 293–5

econometrics, 28–9
economic models of individual choice, 49. *See also* social interactions/interdependence
entropy and logarithmic penalty function, 136–8
event-history analysis, 14–15, 14–17

fixed effects multilevel model, 19–20
Ford-Fulkerson Corollaries/Theorems
Global Ford-Fulkerson (Edge-Cut) Theorem, 333
Global Ford-Fulkerson (Node-Flow-Edge-Cut) Corollary, 332
Local Ford-Fulkerson (Edge-Cut) Theorem, 333
Local Ford-Fulkerson (Node-Flow-Edge-Cut) Corollary, 332
future directions, 31–3

general multiple proto-spline model, 282–3
geostatistics models, 27

Global Ford-Fulkerson (Edge-Cut) Theorem, 333
Global Ford-Fulkerson (Node-Flow-Edge-Cut) Corollary, 332
Global Menger's Theorem A, 330
Global Menger's Theorem B, 333
graphical displays/models, 24
  latent class (LC) models
    1982 General Social Survey data (LC models), 232–7
    restricted two-factor model, 247–8
    rheumatoid arthritis data, 240–3
    two-factor model, 251–1, 253
  social networks (cohesion and adhesion), 321–2
    connectivity and multiple independent paths as cohesion, 329–30
    connectivity and resistance to pulling apart by removal of nodes, 322–5
    edge connectivity, and resistance to pulling apart by removal of edges, 325–9
    edge connectivity and edge-independent paths as adhesion, 333–4
    edge-flow connectivity and node-flow connectivity, 330–2
Guttman scaling, 154

historical overview, 1–5

imputation, 21–2
individual choice-based framework, 53–9. *See also* social interactions/interdependence
  binary decision rules, 60–5
  linear decision rules, 59–60
inequality, poverty and, 50–2

job satisfaction and self-employment status, 196–8
  partitioning association, 212–14
  unconstrained intercepts, models with, 210–12
  uniform association, models based on, 198–210

latent class (LC) models, 8–9, 223–5
  1982 General Social Survey data, 230–7
  bi-plots
    conditional probabilities, formulation using, 255–7
    1982 General Social Survey data (LC models), 233–7
    restricted two-factor model, 244, 245
    rheumatoid arthritis data, 242
    two-factor model, 251–1, 254
  class-membership probabilities, functions of, 257–61
  cluster model, 225–7
  covariance models for latent structure (in longitudinal data), 277–8
    single latent curve model, 291–3
  estimation of, 261–2
  factor model, 227–30
    extensions to, 244–9
  graphic displays
    1982 General Social Survey data (LC models), 232–7
    restricted two-factor model, 247–8
    rheumatoid arthritis data, 240–3
    two-factor model, 251–1, 253
  identification issues, 249–52
  rheumatoid arthritis data, 237–43
latent curve models, 275–7
  double latent curve model, 293–5
  single latent curve model, 291–3
LC models. *See* latent class (LC) models
limited dependent variables, 16, 17–19
linear decision rules (social interactions), 59–60
linear-in-means models (social interactions), 74–8

LISREL model, 13, 14
